

Varun Sharma

Milpitas, CA | (408) 505 2376 | vas001@ucsd.edu | U.S Citizen

EDUCATION

UNIVERSITY OF CALIFORNIA, SAN DIEGO

B.S. Mathematics and Computer Science | Minor: Cognitive Science

Cumulative GPA: 3.9/4.0; Provost Honors 2023-2026

Relevant Coursework: Intro to Programming and Computational Problem-Solving, Data Structures and Object-Oriented Design, Software Tools and Techniques Laboratory, Computer Organization, Web Mining and AI Recommender Systems, Design & Analysis of Algorithm, Database System Principles, Machine Learning: Learning Algorithms

La Jolla, CA

Graduate December 2026

WORK EXPERIENCE

DEEPLEARNING.AI

Software Engineer Intern

Mountain View, CA

Sep 2025 – Present

- Maintaining and updating the DeepLearning.AI [AI Developer Conference website](#), publishing new content, coordinating event changes, and ensuring accuracy of technical event and speaker information.

AI FUND

AI & Technical Program Management Intern

Mountain View, CA

Jul 2025 – Present

- Built the AI Fund [Buildathon website](#) as a full-stack platform for event information, application intake, and HR review.
- Designed and implemented a Retrieval-Augmented Generation (RAG) system leveraging OpenAI APIs and SQL to efficiently query, search, and rank thousands of LinkedIn profiles using natural language, delivering top candidates for targeted outreach for the HR team.

PLANCK AI

Data Validation Intern

Remote

March 2025 – Jul 2025

- Built scalable PDF processing pipelines using PDFPlumber, LayoutParser, and OCR to extract structured data from diverse, multi-layout documents for integration into large language model workflows.
- Enhanced data preprocessing by automating layout validation, segmenting document elements, and generating annotated visualizations to ensure high-quality inputs for LLM tasks.

INTEGEM

Artificial Intelligence & AR Project Intern

Cupertino, CA

Jun 2024 – Sep 2024

- Developed and optimized a TensorFlow-based machine learning algorithm for real-time image recognition using live camera feeds, enhancing system accuracy by 10%.
- Trained image classification models on NVIDIA's Jetson Nano, programmed in Python for AR game development, and constructed Raspberry Pi robots.

ULAB SYSTEMS

R&D Summer Intern

San Mateo, CA

Jun 2021 – Aug 2022

- Developed Python scripts to analyze material stress-force properties while collaborating with engineers and scientists.

PROJECTS

HEALTHCARE PATIENT SCHEDULING CHATBOT

May 2025

- Built a React chatbot with Supabase and the OpenAI API to match patients with appropriate therapists.
- Integrated Google Calendar to automate appointment scheduling and built an admin dashboard for managing inquiries.

AUTOMATIC PLAYLIST CONTINUATION

Dec 2024

- Contributed to a playlist recommendation research project using the Spotify Million Playlist Dataset.
- Implemented Word2Vec, AutoEncoder, and CNN-based models for song representation and sequence prediction.

ADDITIONAL

Technical Skills: Python, SQL, Large Language Models (LLMs), Agentic AI, Retrieval-Augmented Generation (RAG), LangChain, Knowledge Graphs, Reinforcement Learning, AI Planning, Prompt Engineering & Optimization, Generative AI, DataOps, Data Systems, AI Model Inference Optimization, Machine Learning, Deep Learning, TensorFlow, PyTorch, NLP, Computer Vision, Software Engineering, Data Analytics, Git
